Texas Commercial Freeze Claims –
General Overview of Adjustment,
Coverage and Subrogation Issues

Texas Commercial Freeze Claims – General Overview of Adjustment, Coverage and Subrogation Issues – WEBINAR

March 2, 2021

Please join Zelle LLP on March 2, 2021 for a Texas Commercial Freeze Claims – General Overview of Adjustment, Coverage and Subrogation Issues webinar.

Significant claims both in number and magnitude are already being filed as a result of the recent Texas winter freeze event. Some of these claims are for property damage resulting from burst pipes, collapsed roofs, and other causes. Others seek only business interruption losses resulting from loss of power. These claims present a number of interesting adjustment and coverage questions. Some of the claims may also present subrogation opportunities. This webinar will consider the adjustment, coverage, and subrogation issues expected to arise in commercial claims resulting from the Texas winter freeze event.

Though there is no charge to attend, registration via the webinar website is required. Your registration will be reviewed by the webinar host and you will receive confirmation after your registration has been approved.
